EDUCATION AND CERTIFICATIONS

California Polytechnic State University, San Luis Obispo

Expected Graduation: June 2027

Bachelor of Science in Computer Science

GPA: 3.5

- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Artificial Intelligence, Data Science, Programming Languages, Databases, Full-Stack Development

Certifications: AWS Cloud Practitioner

EXPERIENCE

Full-Stack Developer for Paso Food Co-op

September 2025 - Present

Hack4Impact at California Polytechnic State University

- Developed a full stack website for a nonprofit organization using Node.js, React, and MongoDB in a team of 7 developers
- Participated in Agile development, including code reviews and sprint planning
- Implemented CRUD operations and RESTful APIs to support application logic, data processing, and client-server communication

Frontend Developer Intern

July 2025 - September 2025

Neighborhood House Association

Remote

- Led a team of 4 engineers to develop a website used by real educators, enabling efficient search and access to different teaching resources
- Built dynamic and interactive frontend features in React, enabling real-time updates across multiple user interactions
- Planned weekly sprints and code reviews, mentored a junior developer in React, and contributed to improving team development workflow and collaboration

Computer Science Tutor (Part-Time)

September 2025 - Present

California Polytechnic State University Library

- Provided one-on-one and group tutoring in computer science topics such as data structures and algorithms, supporting students with varying levels of experience
- Assisted students with debugging, assignments, and exam preparation, strengthening problem-solving and coding skills

PROJECTS

Catwise | [GitHub](#)

iOS Mobile Application | React Native

- Designed and developed a mobile application using React Native to help new cat adopters through personalized content delivery
- Worked with IBOK Cafe, a nonprofit cat shelter
- Engineered a clean UI design with custom spring and timing animations, gesture-based swipe navigation, animated progress indicators, and reusable card components across 20+ screens

Personal Website | [GitHub](#)

Full-Stack Website | React and MongoDB

- Designed and developed a full-stack personal portfolio website with an interactive map game
- Built a REST API with Next.js API routes and MongoDB to dynamically serve blog posts, projects, and comments with real-time comment submission

TECHNICAL SKILLS

Languages: Java, Python, C, SQL (Postgres), JavaScript, TypeScript, HTML/CSS

Frameworks: React, React Native, Node.js, Flask

Developer Tools: Git, GitHub, Docker, VS Code, Visual Studio, PyCharm, IntelliJ, MongoDB
