EDUCATION AND CERTIFICATIONS

California Polytechnic State University, San Luis Obispo

Expected Graduation: June 2027

Bachelor of Science in Computer Science

GPA: 3.5

- **Relevant Coursework:** Data Structures and Algorithms, Databases, Full-Stack Development, Artificial Intelligence, Data Science, Object-Oriented Programming, Programming Languages

Certifications: AWS Cloud Practitioner

EXPERIENCE

Full Stack Developer for Paso Food Co-op

September 2025 - June 2026

Hack4Impact at California Polytechnic State University

- Developed a full stack website for a 400-member food co-op using Node.js, React, and MongoDB in a team of 12
- Participated in Agile development, including code reviews and sprint planning
- Implemented CRUD operations and RESTful APIs to support authentication, real-time messaging, and event scheduling features

Frontend Developer Intern

July 2025 - September 2025

Neighborhood House Association

Remote

- Led a team of 4 engineers as a project lead to develop a website used by real educators, consolidating resources from 6+ external sources into a single searchable website
- Built dynamic features such as search and filtering in React, greatly reducing the time required for educators to locate relevant educational resources
- Planned weekly sprints and code reviews, mentored a junior developer in React, and improved team development workflow and collaboration by leading weekly team meetings

Computer Science Tutor (Part-Time)

September 2025 - Present

California Polytechnic State University Library

- Provided one-on-one and group tutoring in computer science topics such as data structures and algorithms
- Assisted students with debugging, assignments, and exam preparation

PROJECTS

CatWise | [GitHub](#)

iOS Mobile Application | React Native

- Designed and developed a mobile application using React Native to help new cat adopters through personalized content delivery
- Engineered a clean UI design with custom spring and timing animations, gesture-based swipe navigation, animated progress indicators, and reusable card components across 20+ screens
- Built Supabase-backed APIs to enable users to create, store, and share adoption experiences
- Built a location-based shelter finder that displays nearby cat shelters using the user's real-time location

Personal Website

Full-Stack Website | React and MongoDB

- Designed and developed a full-stack personal portfolio website with an interactive map game that rendered 20+ animated entities
- Implemented a physics-based pathing system, enabling entities to autonomously navigate obstacles in real time
- Developed RESTful APIs using Next.js API routes and MongoDB to dynamically deliver blog posts, projects, and comments, enabling real-time comment submissions.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL (Postgres), JavaScript, TypeScript, HTML/CSS

Frameworks: React, React Native, Node.js, Flask

Developer Tools: Git, GitHub, Docker, AWS, MongoDB
